The benefits of Public Health training through:

Learning Management System (LMS)

Centralized platform for course materials (i.e., Readings, videos, interactive simulations)

Interactive and engaging materials **improve knowledge retention** (i.e., Virtual simulations, data analysis tools)

Easily carry out assessments and receive support from instructors

Students **learn at their own pace** and **at their convenience**

Facilitate and **cultivate collaboration and discussions**

FAQ

Q : Who should use SLiMS?

A : *SLIMS is open to anyone interested in authoring, deploying and learning Public Health techniques & methodologies. It has been used widely by public health experts, academias, and field practitioners from various domain of health including veterinary and wildlife.*

Q : Can we access the platform anywhere?

A : *Yes, SLiMS is an online, web-based platforms that can be accessed anywhere, anytime via a web browser. For optimum user experience we recommend the latest version of Chrome Browser. The platform is also designed to be mobile-web friendly for people who need to learn on-the-go.*

Q : How much does it cost to host and enroll into courses on SLiMS?

A : *There is no cost associated with hosting and enrolling courses on SLiMS per current SafetyNet policy.*

Q : Do I need to attend lectures or submit assignment on specific dates?

A : *Each student can learn at their own pace, as long as they complete the course within its pre-determined time frame.*

Testimonials

"The platform is very easy to use and straight forward, convenient for people who want to learn something that is complicated."

Norhaini Madin
Dept of Veterinary Service Malaysia

"The best thing about this platform is that it was designed for people who are busy with their daily job but still want to learn something new and upskills in their career."

Dr Carol Lim
Ministry of Health

About Hayat Technologies

Hayat Technologies is a pioneering tech company that harnesses the power of AI, machine learning, and Big Data Analytics to deliver innovative solutions. With a focus on public health, wellness, and lifelong care, Hayat Technologies strives to deliver cutting-edge technology to empower individuals, communities, and decision-makers worldwide.

Through our projects and partners worldwide, we've established a strong track record.

Join us in exploring new possibilities together.

Safetynet Learning & Insights Management System

SLIMS

HAYAT

Product Brief

❓ What is it ?

We developed a learning management system for SAFETYNET called SLiMS to assist with training of field epidemiologist vitrtually worldwide. An e-LMS (Electronic Learning Management System) is a software platform designed to help organisations create, deliver, and manage online educational, training content and tools for tracking students' progress and performance. It serves as a centralised hub where instructors or trainers can develop courses, upload learning materials, and interact with mentees.

❓ How is it used ?

SLiMS will be fully utilised by mentors and mentees including SafetyNet officers and epidemiologists, to delve deeper into studying methods & techniques used in Public Health. It enables mentors and mentees to explore the intricacies of public health techniques, analyse data, and collaborate effectively to gain valuable insights and contribute to the field of epidemiology.

❓ What are the outcomes expected ?

An e-LMS can help enhance the learning experience by providing students with access to educational content anytime and anywhere using any device equipped with an internet connection. This enables self-paced studies, assignments completion, and field project submissions, allowing for a comprehensive learning experience.

Challenges & Solutions

The Problem with Traditional Addressing Systems

- Inflexibility
- Time zone difference
- Difficulty monitoring
- Segregated communication
- High cost
- Decentralized learning environment

Proposed Solutions

- Flexible and personal
- Own pace and convenience
- Easy tracking and monitoring
- Single channel of communication
- Save cost
- Centralized learning environment

Modules / Features
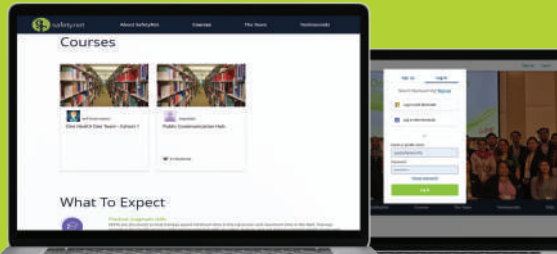

Sign up & Login application

SLiMS is available as a web. You can sign up & login anytime and anywhere
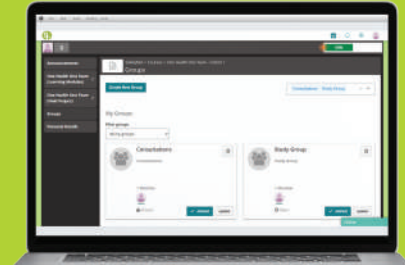

Focus Group Discussion & 1-to-1 Consultations

Students can create their own focus or study group, or set up a one-on-one consultation with their mentor

Modules for Workshop

Learning modules for Workshop are organised according to topics and curricular flow for easier reference
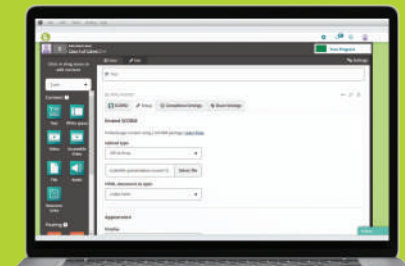

Monitoring Learning Progress

Students can view their own course progression and manage their learning pace and Mentors would be able to supervise their students progression to tackle issues promptly.

Modules for Field Project

Field Project is organized methodically to ease students' experience

Course Authoring Tools

The course authoring tools are intuitive & straightforward, making it easy for any instructor to compose and edit their learning contents
