

March 2024 Newsletter

March Momentum:

Innovations in Motion

Dear Hayat Technologies Community,

Welcome aboard the March edition of our newsletter! Here at Hayat, we're all about innovation, and sure enough, we have some exciting updates to share with you.

As we dive into the second half of Ramadan, we're sending out vibes of peace, reflection, and blessings to everyone observing the holy month. Let's make this month one to remember!

Latest Products & Features

Fresh off the heels of an innovative year, our momentum continues into 2024 as we push the boundaries of innovation.

Hayat Technologies

Seamless Epidemiology Surveillance System

Centralised Digital Platform for Disease Case Registration

A unified, seamless and agnostic digital platform designed for diseases surveillance, offering an organised, centralised and comprehensive database that monitors different health metrics to facilitate data-driven decisions and aid in forming health policies for disease prevention and outbreak response.

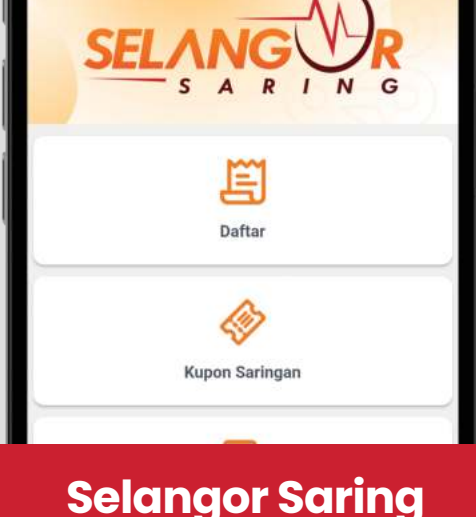

Talent Management System

Holistic Software for Seamless Talent Optimisation

A comprehensive and user-friendly software solution designed to streamline, plan, monitor and optimise talent management processes within a public health organisation.

Selangkah

Selangor Saring

Streamlined Health Screening and Management Module

A module for Selangkah App users to access comprehensive health screening services, check their results and book a follow-up appointment — all via the App. Early detection and management of diseases can help prevent complications and improve health outcomes.

Iltizam Selangor Sihat

Registration Module for State-Sponsored Health Insurance Scheme

A module that allows users to apply for the Iltizam Selangor Sihat insurance program, which provides basic health treatment and insurance benefits to low income groups and their families.

What's Next for HAYAT?

Here's a sneak peek into what lies ahead.

Talent Management System Workshop

One of Hayat's latest endeavours, the Talent Management System streamlines, plans, monitors and optimises talent management processes within a public health organisation.

Hayat will host a two-day workshop to onboard SAFETYNET and CDC Cambodia representatives. Our dedicated staff will guide them on effectively utilising the module and empower them with valuable knowledge to share with colleagues back home.

Event Highlights

Join us in celebrating the memorable moments that mark our continued progress and growth.

Hayat at the ASEAN Digital Awards 2024

Mental Sehat Podcast Production

with Selangor Public Health & Environment EXCO YB Jamaliah Jamaluddin and Mental SEHAT ambassador Farah Ann Abdul Hadi

Selangor CEO, Dr Helmi Zakariah representing Hayat as one of the panel members at the Future Healthcare Asia 2024 conference

Exploratory Meeting with Reset Health UK

Milestones & Recognition

These accolades underscore our commitment to innovation and industry leadership.

ASEAN Digital Awards 2024

SILVER AWARD (Private Sector)

We are thrilled to announce that Hayat has clinched the Silver Award for our Digital Health Screening Tool. Currently deployed through Selangor Government's subsidised screening initiative Selangor Saring, this AI-powered tool is designed to optimise the precision of non-communicable disease screening and improve program outcomes.

Built-in risk stratification algorithms and multi-level health system integration allow for a reduction in unnecessary repetitive screening cost, targeted allocation of screening slots, and better profiling at detecting undiagnosed non-communicable disease cases, in comparison with current conservative methods of relying on individual self-declaration of risk factors.

MySTI Certification

Five of Hayat's solutions — Alrbo, Online Mental Health Support, Digital Health Screening Tool, Lifetime Health Record and Learning Management System — have been awarded with MySTI certification by MRANTI (Malaysian Research Accelerator for Technology & Innovation).

This certification is one of the Malaysian Government's initiatives to further strengthen the commercialisation and marketing activities of local technology and innovation.
